About Me

I started using computers at the age of 10 and I have gained an excellent knowledge in all areas of design, computers and the internet. I am very passionate about the creative industry and I envision the possibility for a better world and future through making technological and artistic breakthroughs in the field of design. In my opinion, better design means a healthier, more prosperous and happier world in general.

One of my greatest strengths is my adaptability, my vast array of technical knowledge and my high attention to detail. I am able to easily adapt from being a designer to a programmer, to an artist, to a software and hardware technician, to a marketing advisor / salesperson, to a creative director. This adaptability can be seen in my design work where I am able to handle any task given, be it print, web, branding or multimedia.
